

Acellus® In Schools...

Healy Schools USD 468, Healy KS

Acellus® has turned our math curriculum into such a quality program that it seems too good to be true.

We started Acellus® during the 2007-2008 school year and experienced a 20-24 point increase in the average grade score on the Kansas State Assessment in math for 7th, 8th, and 9th grade students.

The year before the highest average math score for students in these grades was 68 (1-100 based scale). One year of Acellus®, and our LOWEST average score was 91!

I am almost afraid to acknowledge these gains because I've been in the business a long time and I've never had this kind of success. I have never witnessed gains of this magnitude, but I have every reason to believe the gains will continue.

The greatest strength of Acellus® is naturally differentiated instruction and student self-paced advancement. As students move through the program they are able to grasp the concepts they need on an individual basis.

Our teacher has done a fine instructional job for us, and with Acellus®, his time is greatly leveraged. He is able to concentrate on answering relevant questions asked by the students as they are working in Acellus®.

We are so impressed with the results that Acellus® has become our mathematics curriculum in grades 5 through 11.

USD 468 is so pleased with Acellus® that we have now implemented the Acellus® Reading program as our curriculum in K-2. We expect to see the same great results there, as we look at advances.

John LaFave, Supt./Prin.

Brian Brooks, Acellus® Administrator
